## **DETAILED ACTION**

### ***Response to Arguments***

The applicant's amendment filed 2-4-05 overcomes the examiner's prior art rejection. **Hence claims 1, 3-4 and 7-15 are allowed.**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

1. The applicant has amended the claims to recite highly specific designs and are considered novel over the prior art of record in the examiner's opinion.

2. As mentioned above, Spagna fails to disclose or suggest the combination of features in independent claims 1, 14 and 15:

generating an authentication key, providing an authentication key validity key database for verifying the validity of any of the generated authentication keys', delivering the authentication key to a user', receiving from the user the authentication key to indicate prepayment for the requested service, verifying the validity of the authentication key by means of the validity database and invalidating the authentication key in the validity database in response to the providing of the requested content to the user.

3. The benefit of the invention as claimed compared to Spagna's disclosure is that there is no need for a separate connection from the end-user device to a clearinghouse, which simplifies the implementation of an electronic purchase system. This causes a significant benefit when there is a need to purchase small volume contents from a network to a mobile end-user device. Examples of such small volume contents are text message based contents. There is only the requirement to amend the

authentication key to a content request issued to a network and reduces the delay associated with transmitting the server. The content request and saves network resources. A further benefit associated with the method as claimed is that the authentication keys may be made available anonymously to a third party for content purchase in a manner similar to cash.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
